

Waterless Lithographs by Annie Day

## *Wrapt in Rocky* – Rockhampton, Queensland 24 – 30 June 2012

This promises to be an excellent workshop held in the depths of winter in the lovely warm climate of Rockhampton. Robin and Annie will be teaching their popular classes in waterless lithography – a safer and more environmentally friendly technique of printmaking.

Accommodation is provided in excellent single or double rooms at Rockhampton Girls Grammar School. Previous Wrapt students all rave about the food the school Chef creates. For locals or visitors there is also the non-residential option. You can expect a mild semi tropical winter in Rockhampton.

The workshops run over 5 days covering many disciplines including printmaking, sculptural books and zines.
